

GIRI

Get It Right Initiative

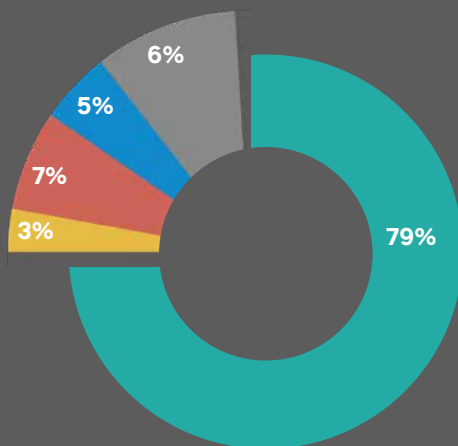

The UK construction industry could save up to £25 billion a year by avoiding error

The Get It Right Initiative is dedicated to making this happen.

Studies suggest the **direct cost of avoidable error** across the construction industry is around 5% of project value – well above average profit levels in the sector and costing approximately £5 billion per annum.

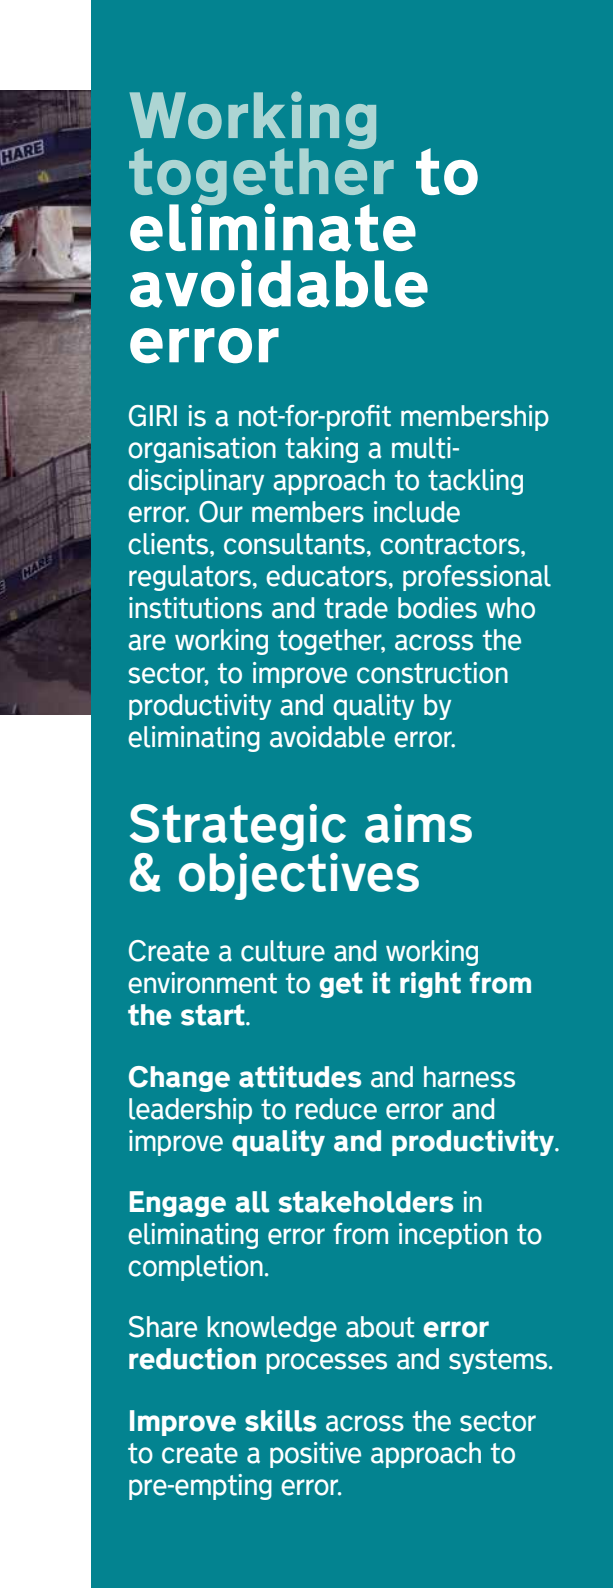

Unmeasured and indirect costs bring estimates closer to 10-25% of project cost, or up to **£25 billion each year** in the UK.

Working together to eliminate avoidable error

GIRI is a not-for-profit membership organisation taking a multi-disciplinary approach to tackling error. Our members include clients, consultants, contractors, regulators, educators, professional institutions and trade bodies who are working together, across the sector, to improve construction productivity and quality by eliminating avoidable error.

Strategic aims & objectives

Create a culture and working environment to **get it right from the start**.

Change attitudes and harness leadership to reduce error and improve **quality and productivity**.

Engage all stakeholders in eliminating error from inception to completion.

Share knowledge about **error reduction** processes and systems.

Improve skills across the sector to create a positive approach to pre-empting error.

“Working together, GIRI members bring industry expertise and insight to tackling the human and financial cost of construction errors.”

*Cliff Smith,
Executive Director,
The Get It Right Initiative*

The GIRI Error Reduction Framework

The GIRI Error Reduction Framework uses a systems-change approach to identify, address and prevent errors in a structured, effective, and proactive way.

A step-by-step methodology encompasses everything from analysing systems to defining solutions and embedding change. Each step is accompanied by recommendations for custom-built GIRI tools or conventional business techniques to offer a roadmap for effective error reduction.

Benefits of membership

Knowledge - Research, insight and learning from industry leaders, research partners and members.

Influence - Be part of a unified members' voice to UK government, shaping the debate and informing policy.

Training - Develop your knowledge and skills with professional training created by GIRI experts. Reduced rates for members and CITB funding available.

Business improvement - The GIRI Error Reduction Framework is a structured, step-by-step process to identify, diagnose and reduce errors. Reduced rates for implementation for members.

Networking - Learn, share and collaborate with other leading construction experts at in-person member events and webinars.
