

# The Get It Right Initiative Online Members' Meeting

Thursday 25<sup>th</sup> February 2021

Working together to eliminate error,  
by industry, for industry.

# GIRI

[getitright.uk.com](http://getitright.uk.com)  [@GIRI\\_UK](https://twitter.com/GIRI_UK)  [@GIRI](https://www.linkedin.com/company/giri)

Get It Right Initiative

# Tom Barton

1949-2020

# GIRI

# AGENDA

- Welcome and Executive Director's report
- The way forward
- Presentation: The Construction Data Trust

## *BREAK*

- GIRI aims & objectives – interactive workshop for members
- Update on GIRI training
- Design Guide progress
- Future events & wrap up

# GIRI

# New members

- Ashe Group
- Ball & Berry
- Joseph Gallagher Ltd
- The Institute of Construction Management
- Mount Anvil
- Sisk
- Solibri

# GIRI

# Get It Right Initiative members – February 2021

# Communications update: website and newsletter

[www.getitright.uk.com](http://www.getitright.uk.com)

Number of users and sessions in January  
both **up 80%** on same period last year

GIRI newsletter

**Almost 1000** subscribers in total

# GIRI

# Communications update: social media

GIRI LinkedIn page: **166%** increase in followers since Feb 2020

GIRI YouTube channel: 19 videos available, around **400 views/month**

GIRI Twitter account: **37%** increase in followers since Feb 2020

# GIRI

# Communications – what now?

- Target internal communications channels within member companies to expand GIRI's reach
- New initiatives give GIRI a good peg for media coverage
- Part-time social media assistant focussing on promoting the GIRI message to a wider audience
- Working with Camargue to review GIRI's messaging

# GIRI

# Error frequency ratio

QUALITY PERFORMANCE INDEX (QPI) SUMMARY - 2020/21																												
RIGHT FIRST TIME METRICS (RFT)			RFT1 Target = 0		Code 2, 3 and Un Coded Documents to be Returned Target <= 4%						DELIVERY OF CERTIFICATION (Not included in QPI score)					NCR					CRAF		CRAF		QPI		Rolling 6 Period	
Period 04 (28/06/20 to 25/07/20)									Cumulative To Date		RFT4 Target >= 90%		NCR Closure Rate Target >= 40%		% of Overdue/Open Target <= 5%		CRAF 1 Score		CRAF 2 Score		QPI - P04		Rolling 6 Period Average QPI		Rolling 6 Period Ranking

## Development

1. Develop lagging indicator (Construct)

2. Develop leading indicators (Design)

3. Error data becomes public information

4. Behavioural KPIs emerge

5. Leading indicators and behavioural KPIs emerge across all processes (Full EFR Realised)

2020

2022

## Implementation

A. Establish enough data to draw conclusions and set targets (GIRI membership)

B. Large clients start comparisons within supply chain. Drive broader uptake and improvement

C. Sectors start comparisons. Drive broader uptake and improvement

D. Private sector procurement decisions influenced by error stats

E. Government procurement decisions influenced by Error stats

# Error Frequency Ratio

# GIRI

# Harnessing technology to eliminate error

# Reflections

**GIRI**

# Strategic aim of GIRI

To improve construction productivity & quality, and reduce costs & waste by eliminating error.

# GIRI

# What now?

- Coming out of lockdown – what has changed?
- The climate crisis and the role of error reduction
- Getting it right first time to reduce waste
- Skills and competency – a legal requirement?

# GIRI

# Strategic Leadership Group

## Remit:

To provide thought leadership and to champion the message of the Get It Right Initiative

# GIRI

# SLG members

Alastair Hitchcock

Paul Lowe

Emer Murnaghan

Ed McCann

Sarah Williamson

Mark Hansford

*Head of Engineering, Phase 2, HS2*

*Partner, Weightmans*

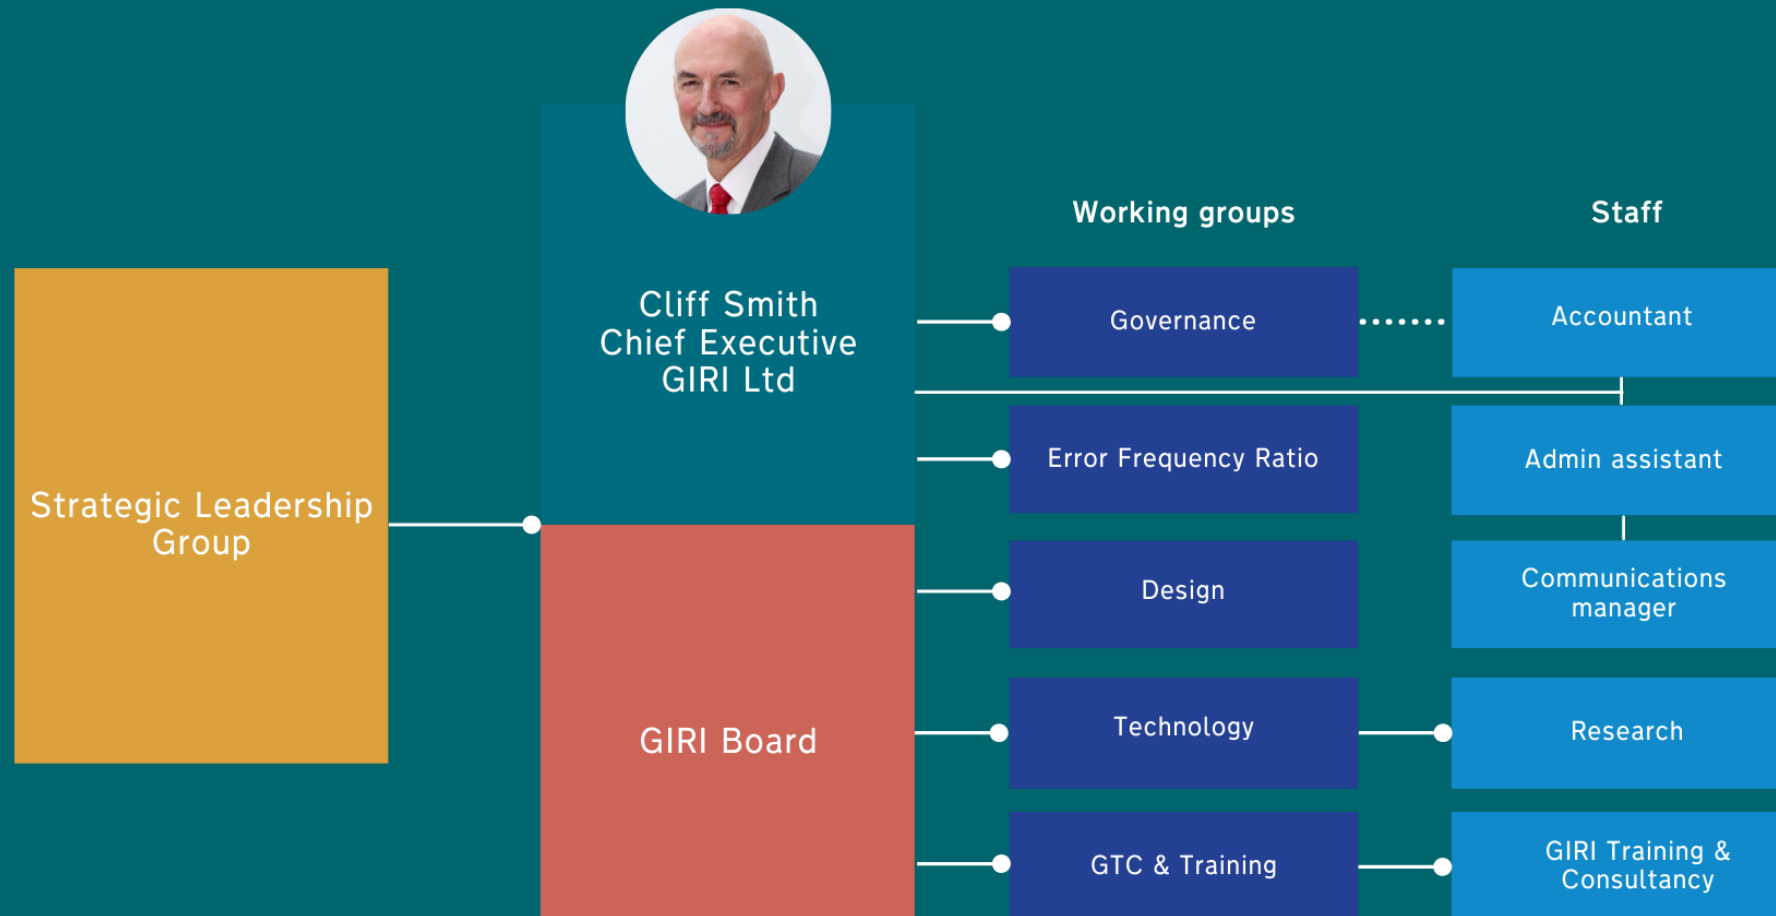

*Head of Responsible Sustainable Business, Graham*

*Senior Director, Expedition Engineering and Vice President, ICE*

*Civil Programme Director, Sizewell C*

*Director of Engineering Knowledge, ICE*

# GIRI

# GIRI

# Other GIRI initiatives

- Zero Error Tiger Team programmes for major clients
- Project start-up workshops to be offered by GTC
- Member-focused workshops
- Assisting CIRIA with in situ concrete guide
- Strengthening links with ADM, SCS, CQI and CIOB

# GIRI

# Construction Data Trust

Presentation by Grant Findlay and Gareth Parkes

# Construction Data Trust

Enabling collaboration through data

A presentation by

**Grant Findlay, Strategy Director**

**Gareth Parkes, Head of Data and Analytics**

**Sir Robert  
McALPINE**

# But first...what is a data trust?

- A legal structure
- Provides independent stewardship of data
- Ensures data is used for an agreed purpose
- Helps deliver the benefits of better data access
  - Enabling collaboration
  - Creates new products
  - Delivers fresh insights
- Construction Data Trust founded 2020

# So...what are our challenges?

- Industry performance could be better
- Knowledge transfer is weak
- Post COVID-19 the way we work has changed forever
- Data is common but we lack the mechanism to share
- Once in a generation chance to 'Build Back Better'

# Case study 1:

## “Safety Steve” – health and safety observation collection made easy via a phone app

- Easily collect information rich observations from anyone on site
- Doesn't matter which words you use, this tool categorises them against pre-defined filters
- Records observations in real-time, avoiding slow paperwork
- Demonstrates standardised data capture can benefit the industry

## Case study 2:

### "Errorless" - App for eliminating errors when citing standards

- Enables 100% of specifications to be 'read', rather than spot checks
- Summarises risks, for quick navigation
- Colour-codes and highlights different types of risk/error
- Enables the user to make quick, risk-based decisions

# Moving away from splendid isolation

- Data collated and shared can deliver great solutions
- Organisations that share data will get ahead
- Engaging means solving complex problems quickly

## Finally... the vision we want to leave you with

- The Construction Data Trust can be transformational
- Collaborative, historic project data will shape future projects
- Data sharing could release £7bn of benefits across UK infrastructure
- We will drive insights from data that would otherwise have been impossible
- Access to this data help innovators drive new capabilities
- We facilitate a common approach: we want you to be part of it

Construction Data Trust

# Get It Right Initiative

A Guide to Improving Value  
by Reducing Design Error

Get It Right Initiative  
Design Guide — Twelve Stages

## Getting the Design Right

Improving Value by Reducing Design Error

1

### Culture

Every project needs a clearly defined intent, a consistent focus on outcomes and the project team to work seamlessly together and adopt the process of back-briefing.

2

### Increased Investment

Increased investment in design reduces project error.

3

### Robust Approach

A clearly defined and well managed design process should be established at the start of a project, and involve all key members of the project team.

4

### Collaboration

Every project will benefit from collaboration, and effective collaboration will lead to more successful projects with fewer errors. It is up to clients and leaders across all disciplines to act to enable collaboration to take place. The adoption of a Partnering Charter should be a key goal at the start of any project.

5

### Plan

Develop a comprehensive project specific plan of work.

6

### Brief

The briefing process is fundamental in defining client needs and expectations, and requires sufficient time to be completed in collaboration with all relevant parties.

7

### Information

Correct and well communicated design information is integral to successful communication between Designers, Clients and Contractors.

8

### Stakeholder Management

Time invested in understanding stakeholder needs and the Client's sign-off and approval process is never wasted.

9

### Opening Up & Closing Down

Opening Up and Closing Down a project allows for all creative thinking and key decision making to be carried out and completed in good time prior to preparation of subsequent production information. This reduces the necessity for change and hence the opportunity for errors.

10

### Contractor Input

All projects, regardless of the form of contract or procurement, would benefit from Contractor advice at the design stage. This should be encouraged and would lead to a reduction in design errors.

11

### Handover

If a comprehensive set of information is produced at the handover stage and communicated and reviewed effectively, then the design is less likely to be misinterpreted, resulting in fewer errors.

12

### Guiding the Design Team

Introduction of an Independent Principal Consultant as the 'controlling mind' for design development is critical to ensure that design related communications are robust, co-ordinated, and well managed.

# GIRI

# Next steps

- Working group to review text and propose modifications
- Text to be updated to create a consistent tone and structure
- New version of Design Guide to be launched Q3/4 2021
- Video to be created to support launch and messaging of Guide

# GIRI

# Q&A session

# GIRI

# Future events – GIRI forums

- 8 March: *The climate crisis: What is GIRI's role, and how can we respond?*
- 29 March: *After Grenfell: How should GIRI respond to the Hackitt Report and Building Safety Bill?*

Visit [www.getitright.uk.com](http://www.getitright.uk.com) for full details

# GIRI

# Future events – organised by partners

- 10 March: *Rebuilding 2021 - a new approach to insurance risk and use of new technologies*. Hosted by Weightmans.
- 17 March: *Improving quality, productivity and reducing waste in construction*. Hosted by CQI London.
- May 2021 onwards: new '*insurance insight*' webinars with Zurich Insurance.

Visit [www.getitright.uk.com](http://www.getitright.uk.com) for full details

# Conclusion

- Get our message to leaders - higher profile for getting it right
- Help us to address Judith Hackitt's frustrations
- We need less talking and more action
- How can we support our members to act now?

THANK YOU FOR TAKING PART
