After Grenfell: How should GIRI respond to the Hackitt Report and Building Safety Bill??

hat happened at Grenfell Tower?

iëwsnight

2. What's happened since Grenfell?

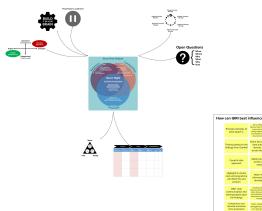

Draft Building Safety Bill - GOV.UK (www.gov.uk) Throughout The Lifecycle Of The Building

The Building Safety Regulator (HSE)

. What does this mean for the way the industry must "behave"

can GIRI best influence behaviours?								
Provide examples of what 'good' is.	Try to influence Board income, Over 1000 - Any pro- nary your lossness test, single suptring mornages and up the Combilet? How only up failed to supply only up income to supply the combiners to supply the combiners the	Share root causes () management causes of hig follows, researched through history and recent	More education of users, more spel sources	First contenting mode to form leased on the UEF - short past deplicates the service as overprise about				
Training based on the findings from Grenfell	Share benchmarks for best practice and lessons learned across the industry	Encourage early engagement of all relevant porties	Look of example from Aux about measuring behaviours upwards	teach people how to have the courage to stand up and challenge				
Cervil & stick approach	Apply your thinking across delivery examples	Ernet already done. DBE should cottaborate with Dame Judith Hackitt.	Challenge compenses / menagement to publish flow they govern quality	Use the Grandell's subjectly to highlight the exerciseable subcomes or petiting it. using and apply this to other appears of condituation, to typic in right				
Highlight to clients cast and programme will affect the end product	keep members informed of lesses developments	That used to be CE KPVs	Publicion key messages on how to perform	provide positive analysis and the issues so industry focused paratical obvice is analistic				
Offer steer communication and training based agon the findings	Country mater range to internative when it gives natural soften thanquist adjudication and astathetion regiff whether premiums is not astatheted a rathoots white:	As a group - support the National COM Conpetince Regulary** which is now part of Galori.	Leadenhip suggest to Clients, emphasing the salue of 589 to productivity, and prime cost	Mobilise clients to look project with true comboustion, feedback larger and collections of success.				
Compulsory user rearrants and come more awareness stortice with remediately.	Held a training session energiality the contextor on a live project to talk specifically should find \$1000CL							

5. So, what do we do now?

	Act as an expert to	Celibrate success.			Set up a template for a meeting at project level, to be	Provide an industry
Publish guidance for the various roles.	help rebuild trust in our industry	When did "we" get it right!	provide a portal of learings righ or wrong	Sharing best practice from others eg RIBA	run by e.g. the contractor, which uses GIRI concepts to explain these changes e.g. what competency means	wide forum for best practice
Understanding scope see previous points, first breakout	Work on changing the negative culture	GIRI should remain independant to gain trust in the industry. GIRI could provide assistance understanding the competancy requirements.	Malcolm Peake suggested looking at the brilliance we have and analyse where the differences are	Cover the gap between BSM and actual application - such as the Design Management Quide	drive cultural change both individually and corporately	how to generate a "level playing field" for all parties e.g. all put the same level of resources into bids and into implementation.
Benchmarking and standard setting, what does good look like	Awareness sessions like this	Attitude training for our teams	Improve ectivariting improve frome first bearing. Offit could foodfate online improve accessibility to good information firmuch professional institutions and bodies.	keep us updated with sessions like this	We need to be able to ensure that our industry gets it right when no-one is looking or listening!	Provide BSB Guides for Clients, Consultants, Contractors, Supply Chain
Understanding the best practice and make it accessible through training/guidence material	Continue to increase GIRI visibility and coverage	Interpret anything that is published so it helps us to understand and digest it!	If Girihas a unlose perpective on mistad resource due to not GRI than use that information to other how that could become a resource to contribute to the 'extra' costs.	Support the "value" of pees pause to get it right, and associated verys of warking bech to get quick response to someone who has peopled pause, so that they get a good extrome familitating dose 50.	create is own competence bodyl	We will be sharing materials on our website afterwards alongside the recording.
create integrity in the workforce	Roll Out Behaviour training	Training and guidance on competence	To use construction institutes for conducting mandatory training/demonstration for building safety	In relation to my comment above I meant wasted resource not 'masted' resource	Every building should have a 'log book'just like our cars have.	Giri to work with other existing bodies to enforce regulations.

4. What are the legal implications?
